PROFILE SUMMARY

Well-trained laboratory technician with very good academic records and with a passion to do more in the future. Have achieved very good grades with a bachelor's degree in microbiology and have had two months' intensive internship in two different health units namely Sabga Baptist Integrated Health Centre and Nkwon Baptist Health Centre (Mbingo Annex).

EXPERIENCE

05 – 10 – 2020 To 31 – 10 – 2020 || ONE MONTH

LABORATORY TECHNICIAN INTERN, NKWON BAPTIST HEALTH CENTRE (MBINGO ANNEX)

- Recorded results on a computer and printed out some specific results the doctor needed.
- Mastered all the abbreviations used in the laboratory and how to write them correctly without missing any letters.
- Worked on the collection of samples and how to place them on the different collecting tubes for the samples to be run.
- Practiced running tests such as hemoglobin electrophoresis, chlamydia, Helicobacter pylori, HBsAg (Hepatitis A, B, and C), High Vaginal smear (HVS), Endocervical smear (ECS), Differential Smear (Neutrophils, Eosinophils, lymphocytes, and Monocytes) blood grouping and blood cross matching for donation, Prostate-specific Antigen (PSA), Syphilis, Microbiology laboratory which deals with the culture of different samples collected to identify a specific bacteria and selection of antibiotic sensitivity test.

28 – 08 – 2020 To 28 – 09 – 2020 || ONE MONTH

LABORATORY TECHNICIAN INTERN, SABGA BAPTIST INTEGRATED HEALTH CENTRE

- Practiced aseptic methods of cleaning work surfaces in the laboratory every morning using warm water, diluted chlorine, and a detergent.
- Worked with a variety of laboratory equipment and machines accompanied by the maintenance of these machines to minimize the chances of giving out false results to patients.
- Practiced running several tests such as Rapid Diagnostic test (RDT), Malaria smear (MP), Typhoid test, HIV test, White Blood Cell Count (WBC), Pregnancy test, hemoglobin level, Urine analysis both Macroscopic and Microscopic, and Stool analysis amongst other tests.
- Recorded patient data in the different logbooks.
